CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. Sonny Malbon
Oceana Salvage
1040 Oceana Boulevard
Virginia Beach, Virginia 23454

Re: Unpermitted Battery Reclamation Facility, RI-002576, Oceana
Salvage, Virginia Beach, Virginia

Dear Mr. Malbon:

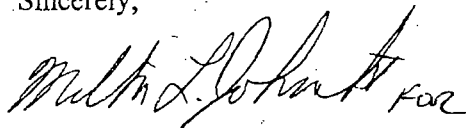

This office has reviewed the remediation plan prepared by your consultant EnviroSolutions, Corporation, for the lead contaminated soil and battery casings at the Oceana Salvage yard. The Department is granting permission for the bench test to be conducted. The test should be completed within sixty (60) days from the date of this letter, weather permitting. The results of the test should be submitted to the Department prior to the start of the full scale test.

Information concerning the waste tires should be submitted to this office indicating the amount of tires being removed monthly. The location the tires are being disposed should be included with the frequency and rate of disposal. This material should be submitted to this office within fifteen (15) days from receipt of this letter.

Mr. Sonny Malbon
Page 2

If the requested information has not been received by the specified time, formal enforcement procedures will be initiated to obtain compliance. If there are any questions please contact me at (804) 552-1251.

Sincerely,

A handwritten signature in cursive script, appearing to read "Kerita L. Kegler".

Kerita L. Kegler
Analytical Chemist, Sr.

While Mr. Malbon was here I also mentioned he would be receiving a letter concerning the tires and the solid waste within the next few weeks. He had no problem with this and he said they were in the process of removing some of the solid waste.
